Staff Communications

Immediate Communications

JTECH Church Solutions allow you to reach parents immediately and silently anywhere, increase staff productivity, manage large groups with ease, provide comprehensive security and offer peace of mind for all parishioners and guests.

Nursery Paging

The PeopleAlert wireless messaging solution with ParentPass™ pagers are the ideal tool for churches that desire silent, immediate and affordable communications. Easy to use, JTECH systems provide the area coverage you require, placing efficient, effective communication at your fingertips.

Key features include:

- Adjustable power settings with up to 2 watts fits all size operations
- UHF technology provides complete coverage with range of up to two miles
- Easy operation and installation
- Out-of-range feature captures patrons and reduces pager loss
- Rechargeable

Staff Communications

The SmartAlert messaging system, featuring StaffComm™ push button messaging, is a flexible family of solutions that will allow you to customize your wireless communication needs. Page from your PC or use a push button transmitter for immediate notification.

Key features include:

- Adjustable power settings with up to 2 watts fits all size operations
- UHF technology provides complete coverage with range of up to two miles
- Easy operation and installation
- Detailed text messaging

Security / AV Ministry

Consistent with JTECH's long-standing reputation and leadership role in delivering on-premise communication solutions, we provide end-users with Motorola® professional two-way business radios and accessories to allow flexibility in applications requiring voice communications. Our suite of solutions include: CLS Series, XTN Series and AX Series radios.

Key features include:

- CLS Radios are designed to work well in buildings up to 15 floors or 200,000 sq. ft.
- The XTN radios offer clear, dependable communications in buildings up to 20 floors or 250,000 sq. ft.
- The AX works well in buildings up to 300,000 sq. ft. or 30 floors.
