

Wireless Communication for Doctor Offices

WOULD YOU LIKE TO SCHEDULE ONE MORE PATIENT PER DAY?

StaffComm™ improves information flow, streamlines traffic in your office and saves valuable time. A small wireless device is placed in exam rooms, labs or with a staff member. Alerts are sent directly to one or more staff members with enough detail to explain the situation. JTECH provides immediate, informative and silent communication at your fingertips.

Nurse Pager

StaffComm Enables You To:

- Eliminate Annoying Overhead PA Noise
- Communicate Specific Requests to Individuals & Groups
- Streamline Patient Flow
- Create a Calm, Stress-Free, Efficient Environment
- Direct Staff to Specific Locations—Reducing Delays

Care by You. Efficiency by JTECH.

For Patient Notification

Communicate with Patients

StaffComm includes the ability to page patients. As soon as a room becomes available, lab results are ready or it is time for a procedure—reception can page the patient ensuring minimum delays and more efficient communication between staff and patients.
