# Immediate Communications

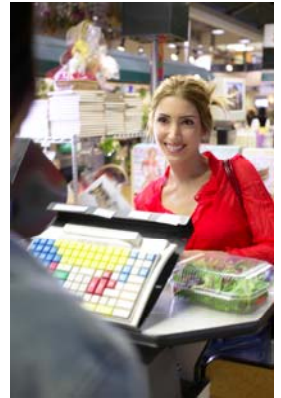

Whether your goal is to improve staff efficiency, to communicate with customers discreetly or eliminate unnecessary and intrusive overhead paging, JTECH Grocery Paging Systems deliver immediate and tangible results.

## SmartAlert®

The SmartAlert messaging system, featuring StaffComm™ push button messaging, is a flexible family of solutions that will allow you to customize your wireless communication needs. Page from any phone extension or use a one or four push button transmitter for immediate notification.

### Key features include:

- 2-watt output works for all operational sizes
- 1 or 4 "canned" messages available
- Easy operation and installation
- Supports group paging
- Supports InstaCall™ alphanumeric and numeric pagers, Glowster®, ShopperPass™ and PeoplePass™ rechargeable pagers

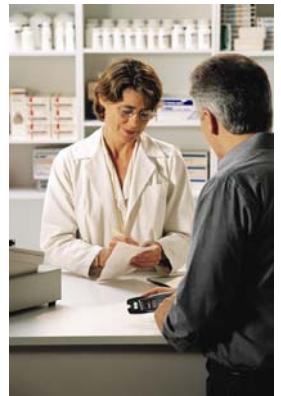

## PeopleAlert™

Immediate, silent and affordable. The PeopleAlert wireless messaging solution improves the grocery experience for your customers. Manage deli and pharmacy queues and communicate with parents in the store. JTECH systems are easy to use and provide the area coverage you require. JTECH gives you the efficient and effective communication you need at your fingertips.

### Key features include:

- Scalable power settings for all operational sizes
- Page from any phone with Telephone Interconnect
- Easy operation and installation
- Out-of-range feature captures customers and reduces pager loss
- Supports group paging
- Supports InstaCall™ alphanumeric and numeric pagers, Glowster®, ShopperPass™ and PeoplePass™ rechargeable pagers
