

Silent Paging Solutions Hotels & Resorts

Bellman / Concierge

First impressions help cement long-standing guest loyalty. Enabling your bellman and concierge to anticipate and respond quickly to guest requests personalizes the guest experience – a keystone to guest satisfaction. Integrated alerts and PC-based messaging help you ensure a seamless, responsive environment for your guests and staff.

- Execute Consistently
- Exceed Guest Expectations
- Improve Guest Loyalty

Guest Check-in

Whether traveling for business or pleasure, today's guests expect a peaceful and relaxing atmosphere from hotels and resorts. Give your guests the gift of time by eliminating long queues and congested lobbies with silent, wireless pagers. Streamline check-in, increase personalized service and give your guests freedom to roam the property.

- Provide Added Convenience
- Locate Guests Immediately
- Accelerate Processes & Services

Housekeeping

Keeping a hotel environment running smoothly is no easy task. Now, getting messages to the right people at the right time is easier than ever. Quickly send a text message to a housekeeper's pager that service is needed, communicate the same message to multiple people at the same time and increase productivity...all from any PC.

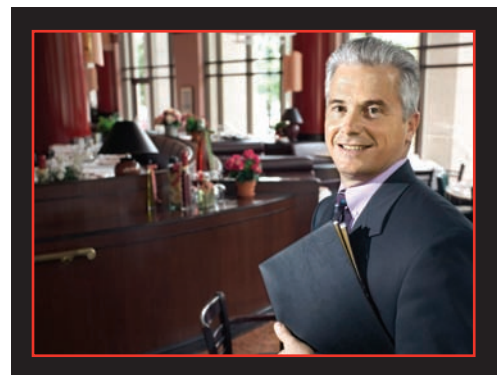

- Streamline Communications
- Optimize Employee Efficiency
- Improve Response Times

Banquets & Catering / Meeting Rooms

You work hard to provide the best service to your guests. Bring simplicity and connectivity to banquet and catering venues by placing a wireless transmitter on a conference or boardroom table, or mount it on a meeting room wall. Your guests can summon a catering attendant, supervisor or manager with the touch of a button.

- Provide Personalized Service
- Reduce Operating Costs
- Enhance Guest Satisfaction

Engineering / Security

Providing a safe and secure environment is a complex process yet one that has to be accomplished as discreetly as possible. Constant and accurate communication is a necessity to ensure a smooth operation, reduce overhead and minimize expenses. Immediately locate and communicate with key mobile employees throughout the hotel or resort at a moment's notice without disrupting the guest experience.

- Provide Secure Environment
- Mitigate Liability
- Improve Responsiveness

Restaurants / Room Service

Promote an ideal atmosphere, one where the guest never has to leave the property, by encouraging dining at hotel restaurants. Silent server paging keeps your wait staff in front of the guest to anticipate needs and attend to every detail, raising service levels and increasing check averages. Integrate managers into the process and keep the entire F&B operation flowing smoothly and efficiently.

- Increase Check Averages
- Reduce Labor Expenses
- Deliver Exceptional Service
