

ValetAlert

Messaging Solutions

Are You Wasting Your Guests Time Waiting in Line?

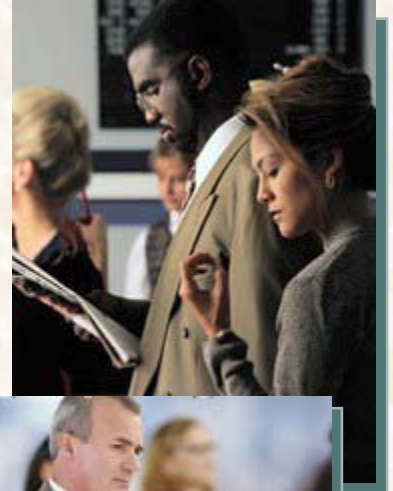

Restaurants, hotels and resorts are all in the guest service business. Take yours up a notch while improving your bottom line with ValetAlert™. Move waiting guests through your busy operation efficiently and painlessly with the help of wireless communications from JTECH.

With ValetAlert, while paying the check or gathering in a hotel lobby, your guests can signal the Valet for their cars to have them ready and waiting upon exiting the building. ValetAlert helps you deliver superior guest service while improving guest flow, maximizing revenue opportunities, especially during your key peak periods.

ValetAlert Benefits

- ◆ *Provide superior service to your guests*
- ◆ *Eliminate ugly queue lines in front of the building*
- ◆ *Streamline entry and exit processes*
- ◆ *Maximize revenues, especially during peak periods*
- ◆ *Improve valet parking services*
- ◆ *Reduce valet labor expenses or contract rates*
- ◆ *Differentiate yourself from the competition*
- ◆ *Create a potential new profit center*

*Let JTECH Be Your Trusted Solutions Partner...
Today And For Years To Come.*

ValetAlert™ Messaging Systems

ValetAlert is part of the JTECH SmartAlert™ family of wireless solutions. ValetAlert leverages JTECH's unique Push Button Paging System to provide the flexibility and convenience of wireless messaging in a whole new way. By the push of a button, your guests can silently signal the valet to deliver their car to the reception area. ValetAlert reduces guest queuing, streamlines your operation and improves customer service.
