

Meeting Rooms For Hotels

Save Hard Labor Dollars Improve Speed of Service

Empower your guests to contact employees immediately and directly with self-service buttons. Employees assisting meeting planners and attendants can respond to guest requests within seconds, no matter where they are on the property.

Whether it is a request for more coffee, assistance with A/V, or the temperature of the room—responding to your guests is critical, time is precious and your reputation is on the line.

StaffComm™ Allows You To:

- Respond immediately to guest requests
- Don't restrict service personnel to the meeting room area
- Allow guests to communicate directly with employees
- Reduce labor
- Increase productivity and profits

Guest-service buttons and alphanumeric pager

Service by You. Efficiency by JTECH.

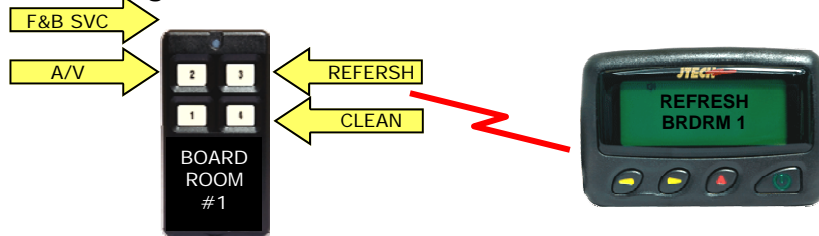

StaffComm™ Hotel Messaging Solutions

JTECH StaffComm™ micro-transmitters and silent pagers give you and your guests the ability to communicate with staff members throughout the property immediately without the noise or expense of two-way radios. Solutions are available in alphanumeric as well as numeric "code" paging.

Empowering guests and being able to respond quickly to requests improves guest satisfaction, increases referral opportunities and leads to more repeat business.

Meeting Room Applications

The StaffComm Meeting Room silent paging system is the ideal tool for resort and business properties that desire silent, immediate and affordable communication tools. Simply provide a StaffComm micro-transmitter in every meeting room to allow guests to call for assistance as needed.

Poolside & Cabana Applications

At Resort and Leisure properties, StaffComm in Poolside and Cabana applications puts F&B services, towels and other services within easy reach of every guest. Increase revenues and take your guest service to a whole new level, catering to every guest individually and personally.
