

SPOTCALL

Miniature Call Button

The SpotCall Call Button provides a simple, reliable way for customers and staff to request assistance with the press of a button. Available in one-button and three-button models, SpotCall wirelessly notifies compatible JTECH pagers to help businesses improve response times and the overall customer and staff experiences.

Features

One-Touch Communication

Instantly connect people with the right team member, improving response times and creating a better experience for everyone.

One or Three Button Options

Choose between single or multiple button configurations to support different request types or workflows.

Reliable Wireless Performance

Wirelessly communicates with compatible JTECH UHF pagers for dependable notification delivery.

For Commercial Environments

A durable housing with a rubber keypad and splash-resistant design stands up to everyday business use.

Custom Holder Options

Optional acrylic holders with interchangeable labels provide a clean installation that can be customized for each location or application
