# LinkWear®

LinkWear is a wearable communication system that delivers staff-to-staff, guest-to-staff, and data partners-to-staff messaging. Send data to the right person at the right time for improved guest and staff satisfaction, operational efficiencies and labor savings.
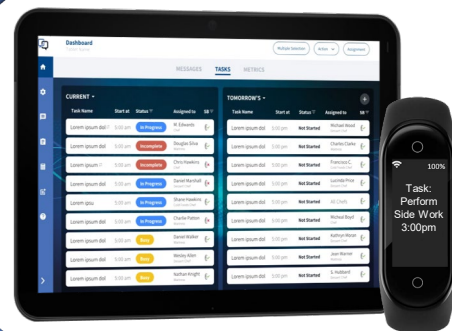

Introducing the Scalable, Ever-Growing LinkWear Ecosystem

CORE

LinkWear Core is the base system and works independently of your network. It features wearable notification smart bands, a smart hub and optional call-buttons.

TASK

LinkWear Task provides the ability to schedule, assign and notify staff of daily tasks and duties and tracks task status via updates sent from smart band.

CONNECT

LinkWear Connect will enable third party providers to send actionable messages to the right person at the right time through our simple API.

Staff Communication Re-Invented!

LinkWear®

Mobilizing Data – Data to the right person at the right time.
Information is received discretely on a Smart Band.
Improved guest & staff satisfaction, operational efficiencies and labor savings.

CORE

LinkWear Core is the base hardware product made up of a transmitter, tablet, smart bands, call buttons, charger and optional range extenders. The system functions independently of other networks.

- Actionable Notifications – Order Up, 86 item, Re-Fire, Check needed at Table 8
- Add Call Buttons for communication at the press of a button
- Fully customizable messages and roles
- Staff-to-staff (Tablet to Band), guest-to-staff (Call Button to Band) notifications

TASK*

LinkWear Task is a cloud-based application that helps you put your operations on auto-pilot. You can create recurring tasks, send reminders to Smart Bands, and monitor status and completion of tasks for individuals or groups.

- Schedule repeating or one-time tasks
- Discrete text messaging to the person(s) responsible for task
- Immediate updates and replies from the band
- Tasks can also be created and assigned for non-band wearers
- Live dashboard of tasks and their status
- Already have a task management system? Integrate to LinkWear to send your tasks to a smart band

CONNECT*

LinkWear Connect enables the LinkWear system to receive messages and alerts from third party data partners directly to your staff's wrist.

- Allows LinkWear to securely deliver messages from non-LinkWear systems via API
- Works with JTECH Applications - HostConcepts, VSK & FindMe
- Actionable Notifications – New Pickup Order Received, Mobile Guest Has Arrived, Staff Member is Approaching Overtime, VIP Seated Table 12, Bad Survey, Average Drive-Thru Wait is Over 5 Minutes
- Voice to Text & Text to Voice capabilities
