RT-780 PGRALPHA Programming Procedure

Shift Left key   Shift Right key   Function Key   Read Key

To enter programming mode, follow the procedures below:

1. Press the "**Function Key**" twice to display the function menu. Press the "**Shift Right Key**" to move the cursor to "**ON/OFF PAGER**" – Press the "**Function Key**" to turn the pager OFF.
2. Press and hold "**Shift Left Key**" and "**Function Key**" keys for 2 seconds simultaneously. The screen will display "**1234**". Default password is "**0000**". With the cursor under the first digit "**1234**" press the "**Function Key**" to change the digit to "**0**". Move cursor with "**Shift Right Key**" to the second digit "**0234**" and press the "**Function Key**" to change the value to "**0**". Repeat for the 3rd and 4th digits.
3. On completion of above press the "**Read Key**" to access the main menu as below:

   "**ABFLPq**"

   > A: Pager Capcode Setting
   > B: BPS
   > F: Frequency
   > L: Language
   > P: Password
   > q: Quit

- Use the "**Shift Key**" to scroll to the option you would like then use the "**Read Key**" to select:
- Option **A** will display as below:
  - "**A : 1234567 1 P**"
    - A: Number of Capcode – 1 to 6
    - 1234567: The seven digits of the pager capcode
    - 1: **1 = ON**, 0 = OFF
    - P: **P = Personal**, M = Mail Drop
  - Use the "**Shift Key**" to go under each number and "**Function Key**" to change numbers, after setting the capcodes, press the "**Read Key**" to return to the main program menu screen.
- Use the "**Shift Key**" to scroll between functions and the "**Function Key**" to select.
- Use the "**Function Key**" to scroll to group if you need to adjust
- After setting, select **q** and press the "**Read Key**" button to save the programmed information and return the pager to stand-by mode.
